A message from Telenor’s President and CEO

Our 160 years of accumulated experience within telecommunications, coupled with a pioneering spirit and a quest for knowledge and growth, has brought Telenor to our current position – a major international communications company. Our success is a result of our ability to provide services that are valuable to our customers. We have set ambitious goals and met them through consistent high performance, with high ethical standards as the basis for our business all around the world. Our culture has become a competitive advantage that is hard to copy.

Today, we are an important part of our customers’ lives, and their communities. With this position comes responsibility. As we move forward, it will become increasingly important to stay relevant to our customers, delivering what is most important for them. We must continue to build a strong and strategically relevant culture across all our Telenor markets. And we must continue to conduct ourselves in a transparent and responsible way, as the basis for our long-term success.

We have defined a strong platform for future growth, summarised in the strategy and the Telenor Way. Our strategy explains what our ambitions are and the enablers to deliver it. The Telenor Way defines our aspirations and sets the standard for how we do business.

Our Code of Conduct is an important part of the Telenor Way and defines the ethical standards for how we all conduct our business and act as responsible and accountable representatives of Telenor. It guides us through our day-to-day dilemmas and is the basis for how we behave as guardians of Telenor’s integrity. The Code of Conduct applies to all of us, irrespective of cultural and geographical differences. The Code has now been updated to clarify and strengthen our policy on Corruption & Bribery and the related areas of Gifts and Business Courtesies and Events and Arrangements.

As we work to reach our targets and strategic ambitions, it is a clear expectation that everyone in Telenor takes the time to understand the elements of the Code of Conduct and have these as the basis for the way they work. Everyone has ownership and responsibility for doing the right thing, because it is the right thing to do. Integrity, openness and transparency are fundamentals in Telenor. In Telenor we do not compromise with integrity, and I thank each of you for your ongoing commitment to conduct business the Telenor Way!

Best regards,

Dear Digizens,

Over the years Digi has built a reputation as a company that upholds a high standard of ethical behavior in all dealings. We have built our business on the foundation of strong moral values and a deep sense of integrity, making Digi, one of Malaysia’s leading companies with over 11 million customers.

As one of Telenor business units, we embrace the Telenor Way which sets the standards for how we work and do business. In the same way, Digi Code of Conduct becomes the guide for Digizen’s ethical and legal responsibilities as an employee. It underlines the manner in which we conduct our business with customers, stakeholder and partners, and defines our culture and the main principles by which we create value in our company.

Together, we have worked hard to establish this ethical business environment that we are known for. We must continue to persevere and ensure that our ethical business standards are consistently adhered to and never compromised – no matter where or with whom we do business.

As we work towards meeting our business goals, it is also important for every Digi employee to fully understand and be guided by the principles within the Code, and apply it in our daily work routines. We must always remember that it underlines the way we think, act, and behave every day.

By sharing the same commitment to have a high standard of integrity, I am confident that we will not only continue to drive a successful business but also secure the trust and respect of our stakeholders and customers.

I look forward for all Digizens to be great brand ambassadors as we drive good business by practicing transparency and professionalism, whilst maintaining the highest level of integrity and governance in the way we work.

Best regards,
Albern Murty
CEO

1 Introduction

Code of Conduct is an integral part of the formal governance regime in Telenor. This Code defines the core principles and ethical standards that form the basis on how we create value in our company. Such principles and standards are further incorporated in other governing documents as appropriate.

Code of Conduct is owned and approved by the Telenor ASA Board of Directors and a key element in the Telenor Way – our way of doing business. What we want to achieve is clarified in the vision, mission and strategy. How we want to achieve our ambitions – the Telenor Way – is constituted in this Code as our ethical foundation, our values for driving the right behaviour and our leadership attitudes for stretching our corporate culture in the desired direction.

This Code shall apply to Telenor ASA and any subsidiary in which Telenor ASA, directly or indirectly, owns more than 50% of the voting shares, or in which the power of control is possessed and exercised by or on behalf of Telenor ASA.

Digi’s Code of Conduct applies to members of the Board of directors, managers and other employees as well as those acting on behalf of the company. This Code does not apply directly to the company’s business partners. However, Digi does not want to be associated with business partners that do not have appropriate ethical standards.

Corporate ethics are about how we behave towards each other and the outside world. Since the Code was introduced in 2003 it has been the foundation of our corporate culture. Everybody associated with Digi shall comply with the rules and guidelines that build on Digi's basic values. In Digi, we want everyone to help create a sound corporate culture.

Whereas failure to perform can be excused, we can never compromise on our integrity. This is the way we shall conduct business in Digi and the way we shall create value for our customers, investors, staff and anyone benefiting from the services we provide.

The Code influences how we think about our actions and what we should and should not do. Every employee shall have an understanding of how this Code influences their daily work, and the ways to act accordingly. It is the personal responsibility of each employee to adhere to the applicable standards.

Line managers shall have an understanding of this Code as a platform for business decisions. They shall also have an understanding of their own role in implementing, overseeing, assessing and following-up that an ethical atmosphere is created consistent with the requirements of this Code.

We shall comply with applicable laws and regulations. In the event that there are differences between such laws and regulations and the standards set out in our Code of Conduct, the highest standard consistent with applicable local laws shall be applied.

Although the scope of this Code has been set to cover relevant ethical areas of conduct, there will be situations where this Code does not provide explicit guidance. In such situations the guiding principles shall be to act in the best interests of Telenor, and to consult with your leader when you are in doubt as how to act.

Any questions on how this Code shall be interpreted or applied shall be addressed with your leader or applicable staff functions. Any unresolved questions shall be addressed to Digi’s Compliance Officer.
